VISHAKHA MEHTA

SALESFORCE DEVELOPER

Udaipur, Rajasthan, India | 9667336991 | vishakhamehta848@gmail.com | https://www.linkedin.com/in/vishakha-mehta08/

PROFESSIONAL SUMMARY

Salesforce Developer with 1+ years of hands-on experience across Apex, Triggers, Flow, Lightning Web Components (LWC), and custom automation solutions. Skilled in Sales Cloud, Service Cloud, Experience Cloud, Agentforce, and Revenue Cloud, with a track record of delivering configuration-driven, reusable, and governor-limit-compliant Salesforce solutions. Salesforce Certified Platform Developer I.

CORE COMPETENCIES

Development: Apex (Classes, Triggers, Batch Apex), LWC, JavaScript, SOQL/SOSL

Integration: REST/SOAP API Integrations, Named Credentials, External Services, JSON/XML Data Exchange, Postman

Automation & Admin: Flow Builder, Process Builder, Approval Processes, Profiles, Permission Sets, Sharing & Validation Rules

Clouds & Platform: Sales Cloud, Service Cloud, Experience Cloud, Agentforce, Revenue Cloud

Tools & Practices: Salesforce CLI, VS Code, Git, Data Loader, Change Sets, Sandboxes, Bulkification & Governor-Limit Optimization

EDUCATIONAL QUALIFICATION

B.Tech — Arya College of Engineering and I.T., Rajasthan Technical University | *2025* | *9.20 CGPA*

Senior Secondary (XII) — Vyas Academy Senior Secondary School, Rajasthan Board of Secondary Education | *2021* | *97.80%*

Secondary (X) — Vyas Academy Senior Secondary School, Rajasthan Board of Secondary Education | *2019* | *85.33%*

PROFESSIONAL EXPERIENCE

Avatu Pvt Ltd — Salesforce Developer *August 2025 – Present*

- Develop custom Salesforce solutions using Apex and LWC, following bulkification and governor-limit best practices.
- Configure and administer the platform: Profiles, Permission Sets, Sharing Rules, and Approval Processes.
- Build REST API integrations using Named Credentials and External Services; manage data migration/integrity via Data Loader.

KEY PROJECTS

Rollup Helper — Configuration-Driven Rollup Framework

A configuration-driven Salesforce solution performing advanced rollup summary calculations beyond standard master-detail limitations, with real-time and batch-based aggregation.

- Designed a configurable rollup engine (custom metadata/objects) supporting SUM, COUNT, MIN, MAX, and AVG operations.
- Built bulkified Apex trigger frameworks plus Batch Apex/Scheduled Jobs to process large data volumes.

Agentforce Implementation — Avatu Sales

Agentforce-driven automation on Sales Cloud streamlining the sales lifecycle from lead creation through asset and quote management.

- Automated the Lead → Opportunity → Quote → Asset lifecycle using Apex, Flows, and Sales Cloud features.
- Implemented rule-based agent/resource assignment with automated status updates and manager notifications.

Reusable LWC Component Library

An internal library of 100+ reusable Lightning Web Components built on strict architecture standards to speed up delivery across projects.

- Built configurable, dynamic components (data tables, charts, PDF viewer, error handling) with no hardcoded data.
- Enforced FLS/CRUD security and fully dynamic, SObject-agnostic Apex controllers across the library.

B2B Logistics Portal — End-to-End Customer & Quote Lifecycle

An end-to-end B2B Experience Cloud solution for a shipping/logistics company, covering the full customer journey from company onboarding and self-registration through RFQ submission, quote management, and order history — not just a static portal.

- Built a Parent/Child Account hierarchy (Parent keyed on PAN, Child branches keyed on GSTIN) with a public self-registration flow provisioning Account/Contact/User and Profile/Permission Set assignment.
- Built the “My Quotes”/RFQ feature on a relabeled Opportunity data model with Apex service classes and LWC components, including quote accept/decline and status-based guardrails.
